Summary

I'm from Kennedale, a little suburb in the DFW area of Texas. It was here where I grew up and found my home in computer science. I wrote my first Java JARs in the 5th grade and delved into C++ and game engine design here. My ultimate goal is to make a living off of what just started as a simple pastime!

Hobbies

- Learning about a variety of technologies
- Developing my 3D game engine (See website for details)
- Developing and maintaining my website
- Being an Aggie!

Qualifications

- Critical thinking skills when working with the most intimidating obstacles such as graphics programming
- Apt knowledge of industry standards including Visual Studio, MSVC, and Git
- Ability to collaborate with others both efficiently and effectively

Work Experience

- Summer internship as an office assistant at a local software development company Hamer Enterprises or HECORP (Jun. 2021 - Aug. 2021)
- Server at a local Chili's (Oct. 2021 - Aug. 2022)

Education

I graduated 5th in my class at Kennedale High School with a 4.45 weighted GPA. I am now enrolled at Texas A&M University at College Station studying computer science.
